Saving Money With CloudZero

CloudZero helps companies save money by making it easy to uncover cost optimization opportunities, quickly detect and remediate anomalies, and maximize commitment-based discounts to ensure continuous savings month after month.

Don't take our word for it. Take a look at what our current customers have to say.

Ben Johnson
Co-founder & CTO

"Right away I think we reduced our bill by 25%, and then beyond that the prevention of increasing our bill. We're going to grow, our bill is going to increase, but if we can start to alert ourselves then we can continue to grow while basically spending as little as possible."

Greg Farrow
Principal Architect

"CloudZero just does exactly what it's meant to do. It solved a problem that we knew we had that no other tool seemed to be able to solve for us — and it's proven to be useful ever since. It has continued to save us significant costs month after month."

Stuart Davidson
Platform Engineering

"Within two weeks, we had already found enough savings to pay for a years' worth of license. It was that good — that intuitive."

Martin Loewinger
VP, Cloud Engineering

"When we saw anomalies, our head development architect very easily determined what we did and didn't need, and disabled certain infrastructure quickly. In one account, disabling an AWS config drove down cost by \$1,000 per month."

Alberto Silveira
Head of Engineering

"Cost per department let us identify significant cloud opportunities in our sales department, of all places. They were using AWS connect to forward calls across different accounts that didn't need to be forwarded. Decommissioning that saved \$30k–\$40k a year. We couldn't see that with our naked eyes."
